技术规格

|                                    |   |
|------------------------------------|---|
| <b>Background:</b>                 | May play a role in subcellular trafficking between the endoplasmic reticulum and Golgi apparatus through interactions with the Rho-type GTPases. Binding to the NS3 protein of dengue virus type 2 appears to subvert this activity into the alteration of the intracellular membrane structure associated with flaviviral replication. |
| <b>Applications:</b>               | ELISA, WB, IHC  |
| <b>Name of antibody:</b>           | NRBP1   |
| <b>Immunogen:</b>                  | Fusion protein of human NRBP1   |
| <b>Full name:</b>                  | nuclear receptor binding protein 1  |

| <b>SwissProt:</b>                  | Q9UHY1  |
| <b>ELISA Recommended dilution:</b> | 5000-10000  |
| <b>IHC positive control:</b>       | Human cervical cancer   |

|                                 |                              |
